## New Arrangement of Water Sports Centre When Thunderstorm Warning is Effective

Thunderstorm warning commonly occurs in summer in Hong Kong. For the effective use of water sports facilities by users, we have reviewed and will implement the new arrangement of opening of Water Sports Centre when thunderstorm warning is effective.

The new arrangement will base on the ‘Location-specific Lighting Alert Service’ provided by the Hong Kong Observatory. For example, the Water Sports Centre will continue to be opened when the lightning signals are shown outside **12km** of CUHK Water Sports Centre (See Figure 1). On the contrary, the Water Sports Centre will be suspended when the lightning signals are shown within **12km** of CUHK Water Sports Centre (See Figure 2) until there is no lighting within **12km**.

The captioned new arrangement has now become effective. Should you have any enquiry, please feel free to contact the Water Sports Centre at 2603 6776.

Thank you for your attention.
